Allies
in Better Sleep
and Breathing

We're working with you to establish healthier business by streamlining patient management, increasing efficiency, and maximizing value.

Sleep therapy

Philips Respironics provides a family of System One solutions designed to deliver exceptional therapy, enhance patient comfort, and provide essential compliance tools.

Not all products are available in all countries. Check with Philips Respironics customer service or your local distributor.

System One: a quality choice

With your input, in addition to the enhanced features and appearance of System One, we've included even more **quality and durability,** while providing you the same exceptional product and sales support.

System One quality comes through

- 25% quieter than its closest competitor
- Designed to eliminate water ingress
- Durable, easy-to-connect, top-mount tubing connections for an exceptional customer experience
- Commitment to quality excellence that earned Philips Respironics the prestigious 2011 Manufacturing Plant of the Year by *Assembly Magazine*
- Assembled in the USA

Learn more.

The SleepMapper self-management solution is compatible with most System One devices, including bi-level systems. To find out more, go to: **www.sleepmapper.com/compatible**

Your System One CPAP options

REMstar Auto†
- 4 modes (CPAP, Auto, CPAP-Check, Auto-Trial)
- A-Flex for comfort
- Opti-Start technology
- Advanced event detection
- Heated Tube option

REMstar Pro†
- 3 modes (CPAP, CPAP-Check, Auto-Trial)
- C-Flex+ for comfort
- Advanced event detection
- Heated Tube option

REMstar Plus†
- 1 mode (CPAP)
- C-Flex for comfort
- Patterns of use data reporting
- Heated Tube option

REMstar SE†
- Flex for comfort
- Enhanced VIC reporting
- On-board memory
- Heated Tube option

Product warranty

All System One devices and humidifiers come standard with a two-year warranty. US only.

†Modem and SD card capable; optional integrated oximetry available.

Therapy for your noncompliant, nontolerant CPAP patients

Your System One bi-level options

Philips Respironics revolutionized sleep therapy by introducing bi-level positive airway pressure technology to treat obstructive sleep apnea. Emulating natural breathing with pressure relief at inhalation and exhalation, this proven technology does more than provide highly effective therapy – it delivers a level of comfort that can mean the difference between compliance and non-compliance for patients having difficulty adapting to traditional CPAP therapy.

BiPAP Auto

- 3 modes (CPAP, fixed bi-level, auto bi-level)
- Adjustable PSmin
- Bi-Flex for comfort
- Advanced event detection
- Heated Tube option
- Modem and SD card capable
- Optional integrated oximetry available

BiPAP Pro

- 2 modes (CPAP, fixed bi-level)
- Bi-Flex for comfort
- Advanced event detection
- Heated Tube option
- Modem and SD card capable
- Optional integrated oximetry available

The SleepMapper self-management solution is compatible with most System One devices, including bi-level systems. To find out more, go to: **www.sleepmapper.com/compatible**

Therapy for your most complicated patients

Your System One advanced therapy options

BiPAP autoSV Advanced

Targets: complex, central, mixed sleep apneas, and Cheyne-Stokes respiration patients

- Clinically proven servo ventilation algorithm
- Auto EPAP for a patient's changing needs
- Real time access to patient data via modems
- Advanced event detection
- Bi-Flex for comfort
- Encore data management and reporting
- New patient waveform reports
- Optional integrated oximetry available

BiPAP S/T

The BiPAP S/T noninvasive ventilator offers a straightforward user interface and integrated heated humidification for easy setup and management. Digital Auto-Trak automatically adjusts variable trigger cycle thresholds enabling optimum patient/ventilator synchrony while System One Heated Tube humidification allows humidity levels to be tailored to meet patient needs.

Market-leading versatility

Technologies that automatically adjust to changing patient needs

Lightweight, versatile and easy to use, Trilogy ventilators are designed for use in the home, hospital and alternative care sites and provide invasive and noninvasive ventilator support for a wide range of pediatric and adult patients. They combine Auto-Trak and AVAPS technologies with advanced flow triggering and leak compensation features that allow for a more sensitive delivery of therapy. Trilogy also incorporates mouthpiece ventilation (MPV). A 'kiss' trigger detects when a patient engages and disengages from the mouthpiece to deliver on-demand ventilation. It combines with an optional MPV support system to enhance patient ease of use.

Key features

- Mouthpiece ventilation (MPV)
- Pressure support up to 40 cm H_2O
- AVAP-AE
- Adjustable AVAPS
- Sensitive Auto-Trak
- On-screen waveforms

MPV circuit support system

An interlocking support system combines with Trilogy's breathing circuit to make access easy for patients. The support system can be attached to various surfaces in many configurations with the use of a clamp designed for use on flat or rounded surfaces. The interlocking support circuit can be adjusted to enhance comfort and accessibility.

Airway clearance

For use by caregivers and patients, in the hospital or in the home, CoughAssist T70 offers a gentle and more comfortable alternative to traditional suctioning methods.

Not all products are available in all countries. Check with Philips Respironics customer service or your local distributor.

Clearly a better solution

CoughAssist is an effective, more comfortable way to clear airways

CoughAssist T70 is a noninvasive therapy that safely and consistently removes secretions in patients with an ineffective ability to cough. It clears secretions by gradually applying a positive pressure (insufflation) to the airway and then rapidly shifting to negative air pressure (exsufflation). This in-exsufflation shift in pressure creates a high expiratory flow that simulates a deep, natural cough. Instead of introducing a suction catheter into the airway, air is delivered noninvasively through a facemask, a mouthpiece, or through an adapter that allows the device to function with an endotracheal or tracheostomy tube.

Key features

- Digital display and push button controls
- AC, DC and optional battery power options
- Cough-Trak automatic sensitivity
- DirectView data management

Respiratory drug delivery

Respiratory Drug Delivery provides innovative drug delivery technologies for the treatment of respiratory and non-respiratory diseases. Our easy-to-use products include compressor nebulizer systems, holding chambers, and peak flow meters, as well as intelligent drug delivery systems that enable the delivery of precise and reproducible doses of drug.

Not all products are available in all countries. Check with Philips Respironics customer service or your local distributor.

Compressor nebulizers

InnoSpire Essence compressor nebulizer system

Compact, lightweight and economical, the InnoSpire Essence compressor nebulizer system combines with proven SideStream technology to provide fast and efficient aerosol drug delivery.

Compressor nebulizers

InnoSpire Deluxe compressor nebulizer system

For use with aerosol medications, InnoSpire Deluxe incorporates built-in conveniences that encourage adherence. It includes a convenient storage compartment to hold extra medicine or nebulizer supplies, the attached power cord tucks neatly into the storage area, and a sturdy handle makes it easy to carry. InnoSpire Deluxe is designed with compliance in mind.

Compressor nebulizers

MicroElite compressor nebulizer system

Proven jet nebulizer technology and a small, compact size combine to make MicroElite uniquely portable and convenient. Half the size of other common portables, it is easy to use and transport. It includes a DC adapter and an optional rechargeable lithium polymer battery. Coupled with quick treatment times, MicroElite provides nebulizer patients with portability and speed that combine to optimize treatment and promote active lifestyles.

Compressor nebulizers

MiniElite compressor nebulizer system

The MiniElite compressor nebulizer system is compact, lightweight, and designed for patient convenience. It can be powered by three versatile power sources – 110VAC, 12VDC (car), and an optional rechargeable lithium ion battery. The freedom to choose when and where patients take their aerosol treatments makes the MiniElite an ideal daily traveling companion.

Nebulizers

SideStream disposable nebulizer

The SideStream disposable nebulizer offers fast, efficient, and economical drug delivery. It provides consistent drug delivery time after time and can be used with all commonly prescribed respiratory medications. It can be used for two weeks before replacing.

Part number		HCPCS
HS800	SideStream disposable nebulizer, 50 pk	A7003
1028219	SideStream disposable cup, 50 pk	A7004
1036160	SideStream disposable with adult mask, 50 pk	A7003, A7015
1041906	SideStream disposable with pediatric mask, 50 pk	A7003, A7015

SideStream reusable nebulizer

The SideStream reusable nebulizer provides maximum aerosol quality and respirable output for the delivery of most commonly prescribed medications. The unique venturi design offers faster drug delivery and shorter treatment times. It can be used for six months before replacing.

Fast treatment times – delivers 2.5 ml of drug output within seven minutes.

Highly efficient – 80 percent of drug output volume is below five microns in size.

Part number		HCPCS
HS860	SideStream reusable nebulizer, 10 pk	A7005
HS860-050	SideStream reusable nebulizer, 50 pk	A7005

SideStream Plus reusable nebulizer

The SideStream Plus breath-enhanced nebulizer features an easy-action inspiratory valve that opens on inspiration to boost medication delivery and closes on exhalation, preserving medication and reducing waste. Significantly less pressure is required to open the inspiratory valve compared to other breath-enhanced nebulizers, making treatments easier for pediatric and elderly patients. And its proven SideStream five-jet venturi design provides a high respirable fraction and shortens treatment times.

Part number		HCPCS
HS870	SideStream Plus breath-enhanced nebulizer, 10 pk	A7005

Nebulizer kits

SideStream custom nebulizer kit

SideStream provides superior performance and fast treatment times. SideStream utilizes five aerosol-producing jet holes compared to a conventional nebulizer's one. The SideStream kit provides a two-month supply of product in every package.

Part number		HCPCS
1028125	SideStream custom nebulizer kits, 25 pk	A7003 and A7004

Includes two complete SideStream disposable nebulizers and two replacement nebulizer cups.

Nebulizer masks

SideStream masks

The SideStream mask is recommended for use with the SideStream high-efficiency nebulizers. The reusable mask is contoured to fit the face. The pediatric mask is recommended for ages five and under; the adult size for ages six and up.

Part number		HCPCS
1025529	SideStream pediatric mask, 50 pk	A7015
1025531	SideStream adult mask, 50 pk	A7015
1052521	SideStream Plus adult mask	A7015

SideStream pediatric eye-safe masks

Sami the Seal and Tucker the Turtle child-friendly masks are designed to appeal to children and have been shown to reduce aerosol deposition in and around the eyes. Used with SideStream nebulizers, Sami and Tucker pediatric masks are made of soft, flexible material for comfort and fit.

Part number		HCPCS
HS880	Sami the Seal pediatric mask	A7015
1044382	Tucker the Turtle pediatric mask	A7015

A cut above the rest

OptiChamber Diamond antistatic valved holding chamber

The "one for all" chamber

In the hospital or at home, its uniquely designed stepped mouthpiece and detachable masks make the OptiChamber Diamond suitable for patients of all ages.

The chamber that fits into your patients' lives

OptiChamber Diamond is smaller than most conventional VHCs and is designed for patient comfort. Its stepped mouthpiece facilitates transfer from pediatric mask to mouthpiece and its flat bottom maintains stability when the VHC is not in use.

Key features

- Intuitive, ergonomic design
- Low resistance expiratory valve
- Flexible pMDI adapter
- Detachable LiteTouch facemasks with soft-seal technology

Part number		HCPCS

1098216	OptiChamber Diamond with LiteTouch large mask, 10 pk, Canada	

OptiChamber Diamond antistatic valved holding chamber (VHC)

The OptiChamber Diamond antistatic valved holding chamber (VHC) is designed for ease of use, to help maximize delivery of pMDI medications to the lungs, and encourage compliance for patients of all ages, at home or in the hospital. Diamond is one of the smallest full-function VHCs available. Its low-resistance valves open freely, even under low pediatric pressures and flows, its flat bottom maintains stability when not in use, its clear chamber allows visualization of medication, and its expiratory valve allows caregivers to count patient breaths. Diamond's stepped mouthpiece better accommodates smaller mouths and helps children easily graduate from mask to mouthpiece. Paired with the comfort and distinctive soft-seal interface of the LiteTouch detachable mask (available in multiple sizes), Diamond promotes aerosol therapy comfort and compliance.

To learn more visit www.philips.com/optichamberdiamond

OptiChamber Diamond is designed for your patients, including those who have:

- **Poor coordination**
  The antistatic material suspends the aerosol longer, meaning your patient has more time to inhale their medication[1].
- **A low inspiratory flow rate**
  Low resistance valves let the patient breath easily through the chamber with minimal resistance.
- **Use a mask**
  Simply attach the LiteTouch facemask, which has soft-seal technology and requires minimal pressure to maintain a proper seal[2].
- **Their medication administered by someone else**
  The exhalation valve visually confirms exhalation, helping the caregiver to count patient breaths and coordinate actuation.

New, smaller and antistatic

AsthmaPACK

The AsthmaPACK adult and children's personal asthma care kit for patient adherence implements three key elements of the NAEPP asthma treatment guidelines with one prescription-peak flow monitoring, MDI drug delivery, and asthma education. One prescription will give your patients a comprehensive, clinician-directed, patient-managed asthma plan with the tools needed to better understand their asthma, monitor their conditions objectively, and take their prescribed medications correctly and consistently.

Part number	
1099014	Adult asthma care kit, 10 pk
1099015	Children's asthma care kit, 10 pk

Includes a peak flow meter, spacer, instructional video, and educational self-help booklet.

AsthmaPACK children's asthma care kit

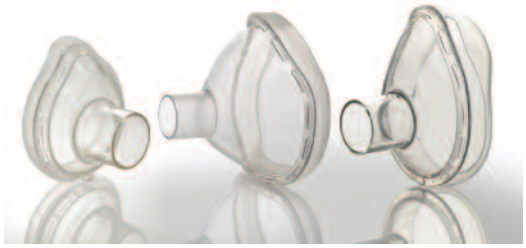
AsthmaPACK children's asthma care kit makes learning to manage asthma child's play. This just-for-kids kit makes learning fun with engaging cartoon characters and age-appropriate devices. An exciting feature of this kit is the interactive bilingual (English/Spanish) coloring and activity storybook, "Tucker Tackles Asthma."

Chambers and masks

LiteTouch valved holding chamber mask

LiteTouch fuses a hard shell to an exclusive soft seal that attaches onto the mouthpiece of the OptiChamber Diamond valved holding chamber (VHC). Gently touching the mask to the face creates a cushion-like seal that quickly contours to the face, making it easy to fit, especially for small children. Coupled with the Diamond VHC, LiteTouch's soft-seal technology minimizes leaks and helps to deliver optimum aerosol therapy for asthma and other respiratory illnesses.

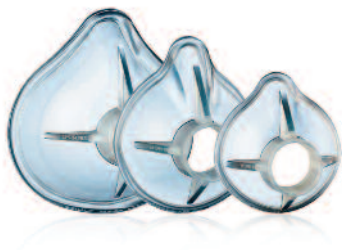
Part number		HCPCS
1082714	LiteTouch mask small, 10 pk	
1082715	LiteTouch mask medium, 10 pk	
1082716	LiteTouch mask, large, 10 pk	



Silicon masks

Our detachable valved holding chamber masks provide an effective seal and conform to fit different facial geometries. Built-in reinforcements help prevent the mask from collapsing and assist in maintaining a seal, especially when your pediatric patients are not cooperative. Available in small (0 – 18 months), medium (1 – 6 years), and large (6 years +) sizes.

Part number		HCPCS
HS81111-010	OptiChamber small face mask, 10 pk	
HS81211-010	OptiChamber medium face mask, 10 pk	
HS81311-010	OptiChamber large face mask, 10 pk	



Peak flow meters

ASSESS

Measure airway obstruction easily, accurately, and cost-effectively. Peak expiratory flow rate (PEFR) provides an objective, clinically-relevant measurement of airflow – at a fraction of the cost, bulk, and inconvenience of conventional spirometry. And, when seconds count, you can count on ASSESS to deliver those measurements with superior accuracy and reproducibility. Everything about ASSESS, from its easy-to-use design, to its easy-to-read scale, to its transparent construction that encourages regular cleaning, to its virtually indestructible polycarbonate body, is designed to make it work better and last longer.

Part number		HCPCS
HS710-012	ASSESS full range peak flow meter, 12 pk	A4614

Unit includes an adult and pediatric mouthpiece.

AsthmaCheck

AsthmaCheck's easy-grip handle directs hands away from the airflow path and ensures accurate measurements every time. Like all of our peak flow meters, it has a built-in three-zone management system and an easy-to-read scale which is suitable to all patients (60 – 810 l/min).

Part number		HCPCS
HS740-012	AsthmaCheck, 12 pk	A4614

Peak flow meters

AsthmaMentor

Turn our peak flow meter into your asthma action plan and teach your patients better asthma management in minutes. AsthmaMentor has been designed to help clinicians teach patients what to do when their asthma conditions change. AsthmaMentor's unique features make the most of the time you have with your patients. The exclusive built-in AutoZone system automatically calculates green, yellow, and red zones when the top of the color bar is set at a patient's personal best or predicted average PEFR. The asthma action plan sticker, which provides color-coded areas where you can write medication instructions, can be affixed to the back of the meter. Your instructions are then easily matched with daily peak flow readings, helping your patient comply with them.

Part number		HCPCS
HS742-010	AsthmaMentor, 10 pk	A4614

Personal Best peak flow meter

Wherever Personal Best goes – in the hospital, office, or home – it sets a new standard for convenience, compliance, and confidence. And Personal Best goes anywhere...easily. A lightweight, self-contained, portable design puts peak flow monitoring at your fingertips – or your patients' – all day long. Plus, a rugged, sterilizable construction helps it stand up to the roughest use day after day. Personal Best encourages compliance with its comfortable oval mouthpiece and easy-to-use built-in handle. And it improves patient communication with its high-legibility scale and NAEPP-endorsed three-zone management system. Available in both full range (60 – 810 l/min) and low range (50 – 390 l/min).

Part number		HCPCS
HS755-012	Personal Best full range peak flow meter, 12 pk	A4614
HS756-012	Personal Best low range peak flow meter, 12 pk	A4614

Mouthpieces

Disposable and one-way valve safety mouthpieces

Safety mouthpieces reduce the risk of cross-contamination during multi-patient screening with Personal Best, ASSESS, AsthmaMentor, and AsthmaCheck peak flow meters. The one-way valve prevents patients from inadvertently breathing in air through their meters during PEFR testing.

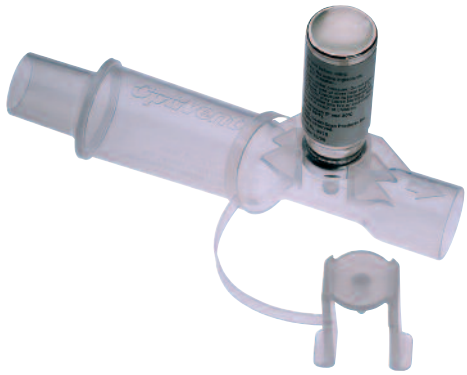
Part number	
HS711-100	Disposable adult mouthpieces for ASSESS, 100 pk
HS712-100	Disposable pediatric mouthpieces for ASSESS, 100 pk
HS715-100	Disposable pediatric plastic mouthpieces for all Respironics' peak flow meters, 100 pk
HS757-100	Disposable mouthpieces for Personal Best, AsthmaMentor, and AsthmaCheck, 100 pk
HS713-200	One-way valve safety mouthpieces for ASSESS, 200 pk
HS714-200	One-way valve safety mouthpieces for Personal Best, AsthmaMentor, and AsthmaCheck, 200 pk

Accessories

OptiVent MDI in-line spacer

The OptiVent MDI in-line spacer is designed to optimize drug delivery and reduce fluid accumulation. Convenient and easy to use, it does not need to be expanded when used with a ventilator circuit.

Part number	
HS762-010	OptiVent, 10 pk
HS763-020	OptiVent with 15mm adapters, 20 pk



Inspiratory muscle trainers

Pflex IMT

Pflex is a highly-effective inspiratory muscle trainer designed to increase respiratory muscle strength. The Pflex trainer is based on the principle of resistance to intake of air into the lungs which makes respiratory muscles work harder. Resistance is controlled by six fixed orifice settings.

Part number		HCPCS
HS553-010	Pflex IMT, 10 pk	E1399

Threshold IMT

Provides consistent and specific pressure for inspiratory muscle strength and endurance training, regardless of how quickly or slowly patients breathe. This device incorporates a flow-independent, one-way valve to ensure consistent resistance and features an adjustable specific pressure setting (in cm H_2O) to be set by a healthcare professional. When patients inhale through Threshold IMT, a spring-loaded valve provides resistance that exercises respiratory muscles through conditioning.

Part number		HCPCS
HS730-010	Threshold IMT, 10 pk	E1399

Threshold PEP

Threshold PEP is used for airway clearance, bronchial hygiene, or as an alternative to chest physical therapy. Threshold PEP incorporates a flow-independent, one-way valve to ensure consistent resistance with adjustable specific pressure settings (in cm H_2O) which are set by the healthcare professional. When patients exhale through Threshold PEP, the resistive load creates positive pressure that helps open the airways and allows mucus to be expelled during "huff" coughing (forced expiratory technique).

Part number		HCPCS
HS735-010	Threshold PEP, 10 pk	E1399

Oxygen

Philips Respironics Right Fit oxygen therapy products are intended to give patients the freedom they want while helping homecare providers reduce expenses and make the most of shrinking reimbursements.

Not all products are available in all countries. Check with Philips Respironics customer service or your local distributor.

EverFlo Q ultra quiet 40 decibel stationary oxygen concentrator

Our compact, 31-pound EverFlo Q is the first ultra-quiet concentrator available at an affordable price. The new EverFlo Q combines the small size, light weight, and low maintenance of our popular EverFlo oxygen concentrator, with the added value of an ultra-quiet sound level. With EverFlo Q, you get the benefits of an ultra-quiet concentrator without the burden of paying an ultra-large premium. And, that's good for you and your patients.

Life made simple

Philips Respironics SimplyFlo stationary oxygen concentrator

For nocturnal patients who may be refusing or resisting therapy because of the size, weight and lifestyle disruptions that can accompany the use of traditional concentrators, SimplyFlo weighs less than nine pounds and is designed to enhance compliance. SimplyFlo is the smallest and lightest continuous flow stationary oxygen concentrator available. It operates on external power only and has no internal battery. An optional travel accessory case allows oxygen patients to easily transport SimplyFlo between locations.

Key features

- Weighs 8.5 pounds
- Provides .5 to 2 LPM continuous flow output
- Operates on AC power (no internal battery)
- Uses less than 1/3 the electricity of traditional stationary concentrators
- Reduces many lifestyle disruptions related to larger stationary concentrators
- Simplifies transport for travel or within the home
- Helps nocturnal oxygen users maintain an active lifestyle during the day

Another solution for nocturnal patients

The optional travel accessory case allows patients to easily transport SimplyFlo between locations.

Once again, Philips Respironics is bringing innovative solutions to your business and your patients. With SimplyFlo, we've created the world's smallest and lightest stationary oxygen concentrator.

SimplyFlo represents a completely new option for nocturnal patients who may be refusing or resisting therapy because of the size, weight and lifestyle disruptions that can accompany the use of traditional concentrators.

Designed to enhance compliance

For many patients new to therapy who only require nocturnal treatment, the intimidating size, weight, and sound of a traditional oxygen concentrator can be a large factor in their rejection of therapy.

Until SimplyFlo, there has not been a significantly lighter, more transportable stationary concentrator designed to help nocturnal oxygen patients improve the adoption of therapy and enhance compliance.

Millennium M10 concentrator

Delivers up to 10 LPM of oxygen reducing the delivery costs associated with 5 LPM and above oxygen patients. The M10 is engineered to reduce the cost of providing oxygen at higher liter flow and has fewer parts than any other concentrator on the market. Fewer parts, combined with greater reliability, help you to reduce expenditures on accessories and unnecessary inventory.

Simplify and SimplyGo

Now one POC meets the portable oxygen needs of nearly all of your products.

SimplyGo is Philips first oxygen concentrator that offers the benefits of a continuous flow mode in a lightweight, easy-to-carry design of 4.5 kg. No need to compromise between an effective oxygen therapy output for your patients and the usual weight of the device. SimplyGo offers a solution that fulfills the needs of most of your oxygen-therapy patients. With SimplyGo, patients have the flexibility to be away for the day, for work, for a weekend or a long holiday.

1065696	UltraFill transfer tubing

UltraFill home oxygen filling system

Is an advanced home oxygen system that combines a stationary oxygen concentrator, filling station, and high-capacity cylinders to meet the needs of a wide range of oxygen patients, including those who are highly active or require continuous flow oxygen. UltraFill also has the needs of your business in mind with features intended to save you money by using existing inventory and lowering your operating costs.

Oximeters

Part number	
920	Hand-held oximeter
920M	Hand-held oximeter with memory

Both include a 936 adult finger clip sensor, six AA batteries, and a manual.

Accessories	
Hand-held oximeter	
100-0433-00	Battery door
927	Extension cable, 3'
1008130	Extension cable, 10'

920M Plus hand-held oximeter with memory

The 920M Plus handheld pulse oximeter provides on-the-spot oximetry readings, and is designed to be easy to use for both healthcare professionals and patients. The 920M Plus features overnight recordings (72 hours of memory), is compatible with all Respironics sensors, uses disposable or rechargeable batteries, and interfaces with Profox and nVISION software.

2500A hand-held oximeter with memory and alarms

The 2500 handheld oximeter is a small, versatile digital pulse oximeter for accurate assessment of blood oxygen saturation and pulse rate. It is ideal for ambulatory monitoring and overnight recordings. The 2500A has two-button operation, is compact, has three power options, and features visual and audible alarms. Compatible with nVision and Profox software.

Oximeters

Part number	
1062232	GO_2 finger oximeter

Accessories	
1062965	Carrying case
1062966	Lanyard

GO2 pulse oximeter

The quality construction and high accuracy of the GO2 finger oximeter allows your patients to take greater control of their lives while creating a new opportunity for your business. Oxygen patients now have a quality alternative in an accurate, affordable, and portable oximeter allowing them the freedom they need to go about their activities. You have the opportunity to offer your patients a personal oximeter that provides accuracy comparable to professional oximeters. Your patients will benefit from GO2's reliable and accurate oxygen saturation and heart rate monitoring information, which allows them to manage both their oxygen and their activity level.

Oximeters

Part number	
1078606	WristOx$_2$ 3150, pulse oximeter with standard accessories (reusable soft sensor, wrist bands, batteries, CD)

Accessories	
1078747	Medium soft sensor, 8 pin (12”/0.3 m)
1078749	Adult flex sensor, 8 pin (12”/0.3 m)
1079107	Adult finger clip sensor, 8 pin (12”/0.3 m)
1084509	Sensor adapter, WristOx$_2$, 3150 (8 to 9 pin)
1078748	Sensor adapter, WristOx 3100 (9 to 8 pin)
1078750	USB PC download cable for WristOx2
1079118	Wrist band, reusable (10”)
1091490	WristOx$_2$, wrist band (8”)
1091489	WristOx$_2$, wristband (6”)

WristOx$_2$ ambulatory digital pulse oximeter

WristOx$_2$ is a wrist-worn pulse oximeter that has been developed to deliver highly accurate readings and help reduce the difficulties that can be associated with overnight oximetry studies. Key design features include an enhanced memory, the use of standard batteries, the addition of wireless data transfer, and more.

Masks

Our complete line of nasal, full-face, minimal contact, and pediatric masks reflect our commitment to innovation and meeting patient and business needs.

Not all products are available in all countries. Check with Philips Respironics customer service or your local distributor.

Nuance

A new standard. A new choice. Nuance gel pillows platform.

We're setting a new standard in nasal pillows masks. Philips Respironics, the world leader in gel cushion technology, is bringing the comfort and sealing power of gel to nasal pillows. As the latest in our groundbreaking new line of masks, Nuance gel pillows represents the new choice for better sleep therapy for clinicians, home care providers and patients.

As the first and only gel pillows platform, Nuance is designed to help patients succeed by providing a more comfortable and familiar feel. With the greater comfort and seal of gel pillows, the ability to fit many different size nostrils and choice of a fabric or gel frame, Nuance is truly a new standard in nasal pillows masks.

Key features

- Choice between fabric or gel frame for comfort with fewer red marks
- Non-slip headgear stays in place throughout the night
- Gel pillows provides greater comfort and seal
- Lightweight, flexible tubing
- Reduces nasal irritation
- Conforms to different size nostrils

Part number		HCPCS

1105180	Nuance/Nuance Pro swivel tube with exhalation	A7045

Nuance. A new choice.

Designed around patients.

Gel frame

- Gel-padded frame and non-slip headgear holds mask in place
- Reduces need for re-adjustment
- High-performance look

To learn more, visit
http://www.theanswer.philips.com/nuance/

Fabric frame

- All fabric frame and headgear enhances patient comfort
- Soft fabric experience for better sleep
- Fewer red marks

Wisp

Delivering a combination of comfort, performance and style.

Developing solutions that meet the needs of a rapidly changing industry calls for fresh thinking and collaboration. At Philips Respironics we traveled around the world asking clinicians, homecare providers, and patients how we could improve their experience.

Clinicians wanted us to resolve the tradeoff between nasal and pillows masks, homecare providers wanted a solution that could reduce operational complexity by getting more patients served from one package, and patients wanted a better overall mask experience that improved their lifestyle.

When you put it all together, the answer is Wisp.

Key features

- Compact design for a natural fit
- Soft and comfortable for a restful night's sleep
- Open field of vision for a feeling of independence
- Quick and easy to adjust for a superior seal and personalized fit
- Contemporary frame options to complement your style

Part number		HCPCS
Wisp, fabric frame		
1094051	Wisp mask with fabric frame, with headgear	A7034, A7035
1094056	Wisp mask with fabric frame, without headgear	A7034

ComfortGel Blue

Staying true to our acclaimed blue gel masks, we've retained the globally popular comfort and flexibility features you expect, while enhancing patient comfort even further. With ComfortGel Blue, we've minimized pressure points, reduced noise, and redirected exhalation air flow away from the bed partner. These and other enhancements may help to create a better patient experience and encourage greater compliance.

EasyLife nasal mask

With its patented Auto Seal technology, the EasyLife nasal mask nearly eliminates the need for manual mask adjustments. Its innovative, lightweight design features a unique dual-cushion construction - the inner cushion creates an instant, self-adjusting seal, while the outer cushion provides comfortable support. The only manual steps necessary are intuitive headgear adjustments, making fitting as easy as possible.

Accessories are not separately billable to the Medicare program, with the exception of replacement circuits. Consult your local Medicare DME MAC local coverage determination (LCD) for details. Commercial insurance plans may provide separate coverage for accessories. Consult insurance company policy manual for more information.

ComfortClassic nasal mask

ComfortClassic features a dual-layer silicone cushion with an outer membrane that fills with air to create a comfortable seal. The thicker inner section provides stability. A dual-position gel spacer molds to the patient's forehead for even greater comfort and stability, and a "silent" exhalation port gives you a mask that may help to improve patient compliance.

Profile Lite

Respironics Profile Lite nasal gel mask and Respironics Profile Lite youth mask

The soft, light cushion is extremely comfortable right out of the box. The gel cushion and forehead pad gently rest against the patient's face for a soft, pillowy fit. The Profile Lite is fully customizable. For a more personalized seal, a 10-minute customization process molds the mask to the individual's facial contours.

Amara

Performance, appeal, and simplicity at its best

With gel and silicone options and our one "click" design, Amara delivers performance and ease of use for your patients. With the addition of a gel cushion option, Philips Respironics has made the ingeniously-simple Amara full face mask even more brilliant. Your patients can now choose the type of comfort they prefer in their cushion with gel or silicone options.

Amara offers an excellent seal with comfort and ease-of-use advantages to current traditional leading full face offerings. Both the gel and silicone options are smaller and lighter weight than the leading full face mask, and have 60% fewer parts. Amara is lightweight with a simple one "click" design and cushion options that fits over 95% of faces.

Key features

- Easy to fit, assemble and use
- Smallest/lightest leading traditional full-face mask
- 60% fewer parts than the leading full-face mask
- Proven to fit 95% of patients' faces

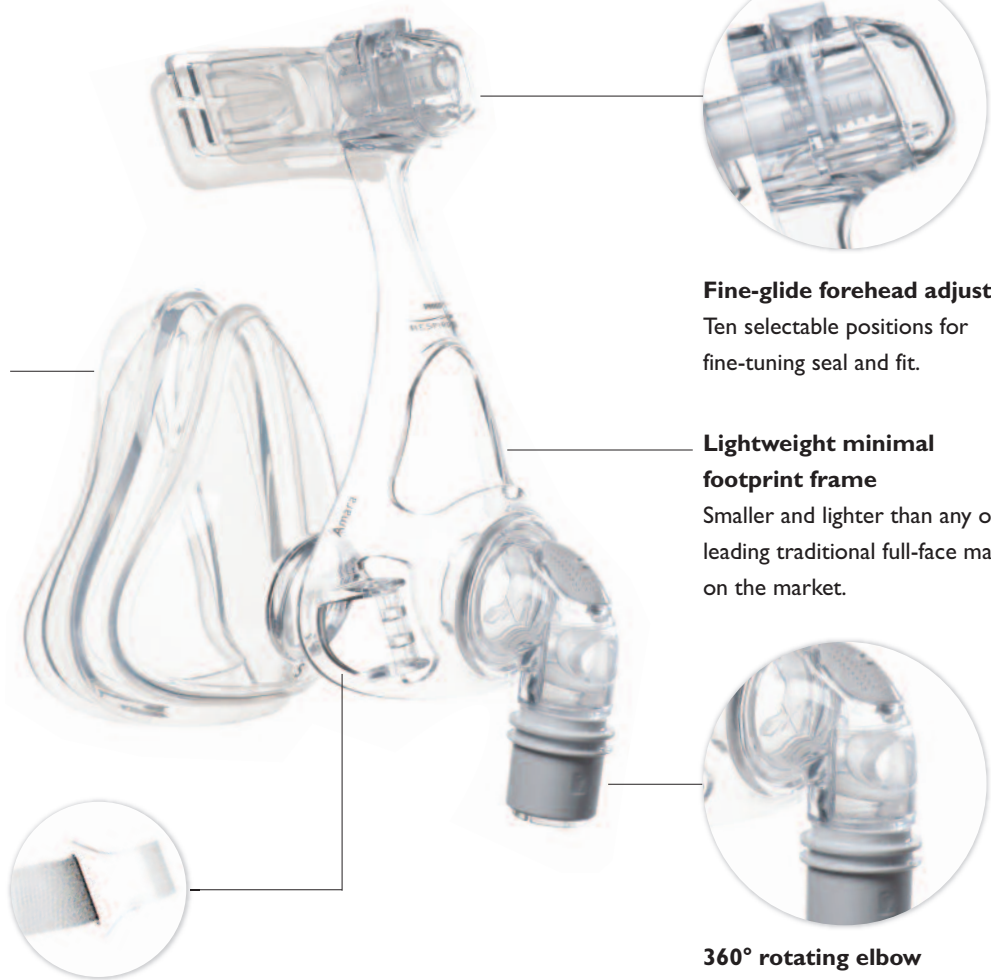
Amara



One "click" cushion assembly
A cushion design that reduces pressure points.

Fine-glide forehead adjuster
Ten selectable positions for fine-tuning seal and fit.

Lightweight minimal footprint frame
Smaller and lighter than any other leading traditional full-face mask on the market.

Quick-fit headgear clips
Reduces the need for continual headgear adjustment.

360° rotating elbow
Quiet-exhalation micro ports with quick release swivel.

Four-part modular design

Modular design for quick assembly and cleaning, with interchangeable cushions available in four sizes.

ComfortGel Blue Full full-face mask

Combines an all-new design with some very familiar – and popular – components. Our comfortable forehead cushion and enhanced StabilitySelector combine with our popular blue gel replaceable cushion to create a level of comfort and stability no other full-face mask can approach. The unique sure seal technology (SST) provides a membrane-thin layer over the gel cushion to follow the contours of the face better, allowing wearers to quickly achieve the comfortable seal they need.

Other headgear can be used with this mask including premium headgear, RS premium headgear, deluxe headgear, and small deluxe headgear.

FitLife

A solution for patients who have difficulty wearing conventional masks or who simply prefer a clear line of sight. FitLife addresses a number of patient issues. Facial hair, dentures, nasal bridge breakdown, facial irregularities, and claustrophobia are issues that can greatly impact the ability to establish effective therapy and comfort. FitLife quickly establishes a robust seal around the less pressure-sensitive perimeter of the face, while maintaining an unrestricted view.

GoLife

GoLife for Men is designed specifically to fit the larger contours of the male facial structure, while GoLife for Women is developed with a distinctly smaller frame and headgear to more closely fit feminine facial dimensions. Both feature straightforward headgear and self-adjusting, optimally angled nasal pillows for a one-step fit. Quite simply, these unique GoLife masks help to take the complexity out of achieving successful nasal pillows therapy for both male and female patients.

Sleep diagnostics

Whether you're considering new PSG systems, home sleep testing systems, titration systems, sensors or other diagnostic tools, we can help you with our full line of in-lab and portable diagnostic products, services and solutions. We offer unlimited software licensing, core software updates, starter sensor kits, and more to help you realize long-term benefits through operational efficiencies.

Not all products are available in all countries. Check with Philips Respironics customer service or your local distributor.

Alice 6 LDx sleep systems

Pair the LDx base station with either the LDxS or LDxN headbox for a full-featured, easy-to-understand system that allows staff to focus more on patients and less on equipment. The LDxS is the perfect front-line headbox for most sleep center needs. Use the LDxN when you need to increase from 19 EEG inputs on the LDxS to a full 32 EEG inputs. The LDx base station works with either headbox, so it's easy to have the right capability where, and when, you need it.

OmniLab Advanced + multi-mode titration system and accessories

With nine therapy modes, a quiet platform, customizable reports, user-friendly features and value-added benefits, you'll find the OmniLab Advanced + to be an ideal system for satisfying your lab titration needs. Along with OmniLab Direct and OmniLab Connect, the OmniLab Advanced + system provides a cohesive, harmonized solution to help you and your sleep technicians operate titration studies efficiently, easily and intuitively.

Alice PDx

Alice PDx is a portable at-home diagnostic recording device for OSA screening, follow-up, and diagnostic assessment of cardio-respiratory sleep disorders. The system satisfies the AASM/CMS HST device guidelines and enables basic screening to comprehensive diagnostic evaluation. The Good Study Indicator conveys the amount of good quality data collected overnight to help you avoid or reduce the costs associated with retesting.

Alice PDx device kits (batteries, SpO_2 probe, and SD card reader, Sleepware also included)

Pro-tech sensors

As a leader in the development, manufacturing, and supply of sleep diagnostic sensors, we offer a full line of high-performance, quality Pro-Tech sensors to help you maintain low cost of ownership while obtaining the data you need. Our sensor product line includes durable and reliable sensors that detect respiratory airflow, respiratory effort, snoring, periodic limb movements, and sleep position.

Not all products are available in all countries. Check with Philips Respironics customer service or your local distributor.

Pro-Flow nasal cannulas

Description	Part number
Pro-Flow, nasal, adult, 7', (60 per case), male luer lok	P1259
Pro-Flow, nasal, adult, 7', (10 pack), male luer lok	P1301
Pro-Flow, nasal, adult, 8.25", (60 per case), male luer lok	P1306
Pro-Flow, nasal, adult, 1.1M, (20 per case), male luer lok	P1317-20
Pro-Flow, nasal, adult, 16", (60 per case), male luer lok	P1328-60
Pro-Flow, nasal, adult, 16", (5 pack), male luer lok	P1390
Pro-Flow, nasal, adult, 7', (10 pack), no filter, male luer lok	1091077
Pro-Flow, nasal, adult, 7', (60 per case), no filter, male luer lok	1091078
Pro-Flow, nasal, pediatric, 7', (60 per case), male luer lok	P1263
Pro-Flow, nasal, pediatric, 7', (10 pack), male luer lok	P1302
Pro-Flow, nasal, pediatric, 1.1M, (20 per case), male luer lok	P1321-20
Pro-Flow, nasal, pediatric, 16", (60 per case), male luer lok	P1381
Pro-Flow, nasal, pediatric small, 7', (60 per case), male luer lok	P1267
Pro-Flow, nasal, pediatric small, 7', (10 pack), male luer lok	P1303
Pro-Flow, nasal, pediatric small, 1.1M, (20 per case), male luer lok	P1323-20

Pro-Flow Plus nasal/oral cannulas

Description	Part number
Pro-Flow Plus, nasal/oral, adult, 7', (30 per case), male luer lok	P1295
Pro-Flow Plus, nasal/oral, adult, 7', (5 pack), male luer lok	P1300
Pro-Flow Plus, nasal/oral, adult, 8.25", (30 per case), male luer lok	P1308
Pro-Flow Plus, nasal/oral, adult, 8.25", (30 per case), no filter, male luer lok	P1334
Pro-Flow Plus, nasal/oral, adult, 1.1M, (10 per case), male luer lok	P1319-10
Pro-Flow Plus, nasal/oral, adult, 16", (30 per case), male luer lok	P1343
Pro-Flow Plus, nasal/oral, pediatric, 7', (30 per case), male luer lok	P1354
Pro-Flow Plus, nasal/oral, pediatric, 16", (30 per case), male luer lok	P1383

Pro-Flow and Pro-Flow Plus cannulas

- Designed to enhance nasal and oral signal transfer
- Soft and narrow nasal prongs help reduce nasal resistance and increase patient comfort
- Incorporate narrow kink-resistant tubing to help facilitate excellent response to high-frequency signals such as snoring
- Hydrophobic, anti-microbial inline filter
- Pediatric and adult sizes

Pro-Flow Plus nasal/oral cannulas

- Addresses monitoring of mouth-breathing patients
- Oral prong detects pressure changes in the mouth
- Pediatric and adult sizes

Pro-Flow MultiPurpose nasal cannulas

Description	Part number
Pro-Flow MultiPurpose, nasal, adult, 7', (30 per case), male luer lok	P1350
Pro-Flow MultiPurpose, nasal, adult, 7', (5 pack), male luer lok	P1368
Pro-Flow MultiPurpose, nasal, pediatric, 7', (30 per case), male luer lok	P1346
Pro-Flow MultiPurpose, nasal, pediatric, 7', (5 pack), male luer lok	P1369
Pro-Flow MultiPurpose, nasal, pediatric small, 7', (30 per case), male luer lok	P1348
Pro-Flow MultiPurpose, nasal, pediatric small, 7', (5 pack), male luer lok	P1370

Pro-Flow Plus MultiPurpose cannulas

Description	Part number
Pro-Flow Plus MultiPurpose, nasal/oral, adult, 7', (30 per case), male luer lok	P1373
Pro-Flow Plus MultiPurpose, nasal/oral, pediatric, 7', (30 per case), male luer lok	P1366

Cannula accessories

Description	Part number
Cannula adapter kit, female luer thread style on 1/8 inch tubing	P1324
Double-port CPAP titration kit Kit contains: 12 cannula titration filters, 2 male luer loks, 2 circuit connection ports, small bore connecting tubing	P1327
CPAP titration kit, Alice PDx, connects CPAP circuit to PDx via male luer lok	P1391
Cannula or titration filter, (50 pack), male and female luer lok	P1107
Cannula or titration filter, (10 pack), male and female luer lok	P1109
RUSleeping RTS kit, male luer lok	1041483
Pro-Wrap, 100 Pro-Wrap per roll, no active sensor	P1162
Pro-Flow sample pack, includes P1259 (qty: 2) and P1295 (qty: 2)	P1258

Pro-Flow MultiPurpose and Pro-Flow Plus MultiPurpose cannulas

- Designed to concurrently monitor airflow and end-tidal CO_2
- Provides ability to monitor three parameters (airflow, snore, and $EtCO_2$) with one patient interface
- Can be used with most pressure transducers and continuous sampling capnographs
- Hydrophobic, anti-microbial inline filter
- Pediatric and adult sizes

Thermal airflow

Reusable thermocouple (cannula style)

Description	Part number
Thermocouple 6" single element, adult, 1.5mm connectors	P1221
Thermocouple nasal/oral airflow sensor, 1 channel, adult, 1.5mm connectors	P1222
Thermocouple nasal/oral airflow sensor, 2 channel, adult, 1.5mm connectors	P1224
Thermocouple nasal/oral airflow sensor, 3 channel, adult, 1.5mm connectors	P1226
Thermocouple oral airflow sensor, adult, 1.5mm connector	P1273
Thermocouple airflow sensor, 1 channel, adult, binder connector	P1757
Thermocouple airflow sensor, 1 channel, adult, binder connector	P1758
Thermocouple nasal/oral airflow sensor, 1 channel, pediatric, 1.5mm connectors	P1223
Thermocouple nasal/oral airflow sensor, 2 channel, pediatric, 1.5mm connectors	P1225
Thermocouple airflow sensor, 1 channel, pediatric, binder connector	P1759
Thermocouple airflow sensor, 1 channel, pediatric, binder connector	P1760
Thermocouple nasal airflow sensor, 1 channel, pediatric small, nasal bridgemount, 1.5mm connectors	P1214
Thermocouple airflow sensor, 1 channel, pediatric small, binder connector	P1761
Thermocouple airflow sensor, 1 channel, pediatric small, binder connector	P1762

Disposable thermocouple

Description	Part number
Reusable wireset	P1238
Disposable thermocouple nasal/oral airflow sensor, adult, (10 pack), 1.5mm connectors	P1242
BreathSensor cable, adult, 1.5mm connectors	P1332
BreathSensor cable, adult, 249 connector (2-pin keyhole) (orange)	P1154
BreathSensor cable, SD20, adult, 220 connector (3-pin keyhole)	P1112

Thermocouples and thermistors

- Compatible with most major PSG systems
- Ability to monitor oral/nasal separately and/or together with adult and pediatric sizes and disposable thermocouples
- Insulated tips
- Six-month warranty

Reusable thermistor

Description	Part number
Alice 3	
Thermistor, 1 channel, nasal/oral, adult, 2.5 connector	P1246
Thermistor 1 channel, nasal/oral, pediatric, 2.5mm connector	P1298
Thermistor 1 channel, pediatric small, nasal bridgemount, 2.5mm connector	P1296
Alice 4	
Thermistor, 1 channel, nasal/oral, adult, LEMO triaxial connector	P1286
Thermistor 1 channel, nasal/oral, pediatric, LEMO triaxial connector	P1299
Thermistor 1 channel, pediatric small, nasal bridgemount, LEMO triaxial connector	P1297
Alice 5	
Thermistor, 1 channel, nasal/oral, adult, 1.5mm connectors	P1274
Thermistor 1 channel, nasal/oral, pediatric, 1.5mm connectors	P1336
Thermistor 1 channel, pediatric small, nasal bridgemount, 1.5mm connectors	P1337
Thermistor, oral, adult, 1.5mm connectors	P1344
Alice 6	
Thermistor, 1 channel, nasal/oral, adult, 249 connector (2-pin keyhole)	1078754
Thermistor, 1 channel, nasal/oral, pediatric, 249 connector (2-pin keyhole)	1078755
Thermistor 1 channel, pediatric small, nasal bridgemount, 249 connector (2-pin keyhole)	1078756
Thermistor, oral, adult, 249 connector (2-pin keyhole)	1078757
Alice PDx	
Thermistor airflow, nasal/oral, adult, Alice PDx, 2.5mm connector	P1388
Thermistor, oral, adult, Alice PDx, 2.5mm connector	P1379
Stardust II	
Thermistor airflow, nasal/oral, adult, Stardust II, harwin connector	P1339
Other	
Thermistor, 1 channel, nasal/oral, adult, Sandman SD20, 220 connector (black)	P1364
Thermistor, 1 channel, nasal/oral, pediatric, Sandman SD20, 220 connector (black)	P1378
Thermistor, 1 channel, nasal/oral, adult, Embletta, 249 connector (2-pin keyhole) (gray)	P1274-249
Thermistor, 1 channel, nasal/oral, pediatric, Embletta, 249 connector (2-pin keyhole) (gray)	P1298-249

PTAF2

Description	Part number
PTAF2 (kit contains: PTAF2 module, a 9V battery, and one P1258 cannula sample pack)	P1287

PTAF2 cables

Description	Part number
High level cable, 7', 1/8 male connector	P1078
High level cable, 7', 1/8 female connector	P1079
High level cable, 7', 3/32 male connector	P1080
High level cable, 7', 1/4 male connector	P1081
High level cable, 7', 6-4 modular connector	P1082
High level cable, 7', 3.5mm connector	P1138
Low level cable, 7', 1/8 male connector	P1076
Low level cable, 7', 3/32 male connector	P1077
Low level cable, 7', 1.5mm connector	P1075
Extension with coupler, 25'	P1087-025
Extension with coupler, 50'	P1087-050
Extension with coupler, 100'	P1087-100

PTAF2 pressure-based transducer

- Designed to generate accurate respiratory signals
- Includes high-level and low-level outputs, unfiltered or filtered airflow output, snoring output, and remote-control options
- Used in AC or DC configurations and during CPAP titrations
- One-year warranty

Pressure sensor

Description	Part number
Pressure sensor, domestic, Alice 6	1076590
Pressure sensor, international, Alice 6	1076592

PTAF Lite

Description	Part number
PTAF Lite startup kit Kit contains: P1258: cannula sample pack; P1289: PTAF Lite	P1289
PTAF Lite for Alice 5	P1304R

PTAF2 and PTAF Lite accessories

Description	Part number
Cannula titration filter (50 pack)	P1107
Cannula titration filter (10 pack)	P1109
Cannula adapter kit	P1324
CPAP titration kit	P1327
CPAP titration kit Alice PDx	P1391
Cannula sample pack	P1258

Stardust PTAF

Description	Part number
Stardust PTAF sensor kit, (includes 5 cannula starter pack), harwin connector	P1396
Stardust PTAF sensor (sensor only), harwin connector	P1340

The PTAF Lite is a small, lightweight piezo-style pressure transducer used in AC device configurations.

Please have available the make and model number of polygraph you are using when you contact our customer service department to receive the correct configuration for your unit.

Respiratory inductance plethysmography effort sensors

zRIP DuraBelt startup kits

Description	Part number
Alice 3	
zRIP DuraBelt kit, adult, Alice 3 Kit contains: 1 each P1734 zRIP Alice 3 driver module, 2 each P1133 zRIP wiresets, 2 each 1073622 zRIP DuraBelts, adult	1076331
zRIP DuraBelt kit, pediatric, Alice 3 Kit contains: 1 each P1734 zRIP Alice 3 driver module, 2 each P1133 zRIP wiresets, 2 each 1075970 zRIP DuraBelts, pediatric	1076332
Alice 5	
zRIP DuraBelt kit, adult, Alice 5 Kit contains: 1 each P1736R zRIP Alice 5, 2 each P1133 zRIP wiresets, 2 each 1073622 zRIP DuraBelts, adult	1076333
zRIP DuraBelt kit, pediatric, Alice 5 Kit contains: 1 each P1736R zRIP driver module, 2 each P1133 zRIP wiresets, 2 each 1075970 zRIP DuraBelts, pediatric	1076334
Alice 6	
zRIP DuraBelt kit, adult, Alice 6 Kit contains: 2 each 1073622 zRIP DuraBelts, adult, 2 each P1133 zRIP wiresets	1078925
zRIP DuraBelt kit, pediatric, Alice 6 Kit contains: 2 each 1075970 zRIP DuraBelts, pediatric, 2 each P1133 zRIP wiresets	1078926
Alice PDx	
zRIP DuraBelt kit, adult, Alice PDx Kit contains: 2 each P1170 wiresets, 2 each 1073622 zRIP DuraBelt, adult	1075969
Other	
zRIP DuraBelt kit, adult Kit contains: 1 each P1732 zRIP driver module, 2 each P1133 zRIP wiresets, 2 each 1073622 zRIP DuraBelt, adult	1076329
zRIP DuraBelt kit, pediatric Kit contains: 1 each P1732 zRIP driver module, 2 each P1133 zRIP wiresets, 2 each 1075970 zRIP DuraBelts, pediatric	1076330
zRIP DuraBelt Sum RT kit, adult Kit contains: 1 each P1753 zRIP Sum RT driver module, 2 each P1133 zRIP wiresets, 2 each 1073622 zRIP DuraBelts, adult	1076336
zRIP DuraBelt Sum RT kit, pediatric Kit contains: 1 each P1753 zRIP driver module, 2 each P1133 zRIP wiresets, 2 each 1075970 zRIP DuraBelts, pediatric	1076337
zRIP DuraBelt kit, adult, DC Kit contains: 1 each P1738 zRIP driver module, 2 each P1133 zRIP wiresets, 2 each 1073622 zRIP DuraBelts, adult	1076335

zRIP respiratory effort sensors and zRIP DuraBelts

- Provide linear breathing movement tracings with no false paradoxing
- Incorporate enhanced woven wire and buckle design
- Offer complete patient coverage
- Facilitate easy initial placement, and easy middle-of-the-night adjustments
- Fully washable
- Available in non-SUM and SUM RT (breath-to-breath summation) modules
- Replaceable batteries
- One-year warranty

Respiratory inductance plethysmography effort sensors (continued)

zRIP DuraBelt startup kits (continued)

Description	Part number
Other (continued)	
zRIP DuraBelt kit, pediatric, DC Kit contains: 1 each P1738 zRIP driver module, 2 each P1133 zRIP wiresets, 2 each 1075970 zRIP DuraBelts, pediatric	1075972
zRIP DuraBelt kit, adult, QDC Kit contains: 1 each P1176 abdomen cable, 1 each P1177 ribcage cable and 2 each 1073622 zRIP DuraBelts, adult	1075968
zRIP DuraBelt kit, pediatric, QDC Kit contains: 1 each P1176 abdomen cable, 1 each P1177 ribcage cable and 2 each 1075970 zRIP DuraBelts, pediatric	1075967

zRIP modules

Description	Part number
zRIP module, 1.5mm connectors	P1732
zRIP SUM RT module, 1.5mm connectors	P1753
zRIP module, Alice 5, 1.5mm connectors	P1736R
zRIP module, Alice 3, LEMO, 2-pin connector	P1734
zRIP module, DC, 3.5mm connector	P1738

zRIP DuraBelt effort sensors

Description	Part number
zRIP DuraBelt adult, size: 24" - 74", 1.5mm panel mount black	1073622
zRIP DuraBelt adult, large, size: 45" - 123", 1.5mm panel mount black	1075973
zRIP DuraBelt, pediatric, size: 16" - 42", 1.5mm panel mount black	1075970

zRIP wiresets and cables

Description	Part number
zRIP wireset, 249 connector (2-pin keyhole)	P1133
zRIP wireset, Medcare, 249 connector (2-pin keyhole)	P1137
zRIP wireset, Alice PDx, 249 connector (2-pin keyhole)	P1170
zRIP snap adapter	P1151
zRIP cable abdomen, proprietary QDC connector	P1176
zRIP cable ribcage, proprietary QDC connector	P1177

Respiratory inductance plethysmography effort sensors (continued)

ezRIP DuraBelt kits

Description	Part number
ezRIP adult kit, 1.5mm, 84"	1099514
1 Abd, 1 Thx, 2 zRIP DuraBelts, adult	
ezRIP adult kit, Alice 5/LE, 84"	1099515
1 Abd, 1 Thx, 2 zRIP DuraBelts, adult	
ezRIP adult kit, 249, 84"	1099516
1 Abd, 1 Thx, 2 zRIP DuraBelts, adult	
ezRIP adult kit, 249, 16"/20"	1099517
1 Abd, 1 Thx, 2 zRIP DuraBelts, adult	
ezRIP adult, Stardust II kit	1099558
1 Thx, 1 zRIP DuraBelt, adult	

ezRIP combination module/wireset (individual component)

Description	Part number
ezRIP module, abdomen, 1.5mm, 84"	1094094
ezRIP module, thorax, 1.5mm, 84"	1094096
ezRIP module, abdomen, 1.5, 84", Alice 5/LE	1094110
ezRIP module, thorax, 1.5, 84", Alice 5/LE	1094111
ezRIP module, abdomen, 249, 84"	1094093
ezRIP module, thorax, 249, 84"	1094095
ezRIP module, abdomen, 249, 20"	1094920
ezRIP module, thorax, 249, 16"	1094921
ezRIP module, thorax, harwin, 26"	1094097

ezRIP combination module/wireset sensor

- Low initial RIP investment
- Minimizes bedside module congestion
- Easy configurability – the driver module clips directly onto the zRIP DuraBelt and legacy zRIP belt
- Non-replaceable batteries
- One-year warranty

Understanding RIP signals vs. piezo signals

RIP	Piezo
Directly reflects breathing activity of a patient	Indirectly reflects breathing activity of a patient
Sensor wire wraps around the patient	Sensor (piezo) most commonly located near the belt buckle
Belt only needs to be snug on the patient for an accurate signal	Belt needs to be pulled taut for an accurate signal
Gain settings do not change during the night when the signal decreases	Gain settings usually need to be altered during the night to capture the signal
The signal decreasing reflects true patient breathing effort	The signal decreasing, or changing, can reflect "trapping" or artificial artifact
Thoracic belt placement is designed to be more precise than piezo	Belt placement can be anywhere in the thoracic area and pulled tight

Piezo respiratory effort sensors

Piezo respiratory effort kits

Description	Part number
Piezo 1 channel adult kit Kit contains: 1 each P1420 adult Velcro® strap kit 1.5", 1 each P1460 piezo sensor 1.5", 1.5mm connectors	P1461R
Piezo 2 channel plus adult kit Kit contains: 2 each P1420 adult Velcro strap kit 1.5", 3 each P1460 piezo sensor 1.5", 1.5mm connectors	P1463R
Piezo 1 channel pediatric kit Kit contains: 1 each P1416 pediatric Velcro strap kit 1.5", 1 each P1460 piezo sensor 1.5", 1.5mm connectors	P1483
Piezo 1 channel pediatric kit Kit contains: 1 each P1448 pediatric Velcro strap kit 1", 1 each P1453 pediatric piezo sensor 1", 1.5mm connectors	P1462R
Piezo 2 channel plus pediatric kit Kit contains: 2 each P1448 pediatric Velcro strap kit 1", 3 each P1453 pediatric piezo sensor 1", 1.5mm connectors	P1464R
Adult Velcro strap kit, 1.5" Kit contains: 1 each adult Velcro strap 1.5", size 1, size 2, and size 3	P1420
Pediatric Velcro strap kit, 1.5" Kit contains: 1 each pediatric Velcro strap 1.5", size 1, size 2, and size 3	P1416
Pediatric Velcro strap kit 1" Kit contains: 1 each pediatric Velcro strap 1", size 1, size 2, size 3, and size 4	P1448

Piezo respiratory effort sensors

Description	Part number
Piezo sensor, 1.5", adult, 1.5mm connectors	P1460
Piezo sensor, 1" pediatric, 1.5mm connectors	P1453
Piezo sensor, 1.5" adult, Alice 4, LEMO triaxial connector	P1571
Piezo sensor, 1.5" adult, Alice 3, 2-pin LEMO connector	P1547
CT2 piezo sensor, adult, 1.5mm connectors	P1582
CT2 piezo sensor, pediatric, 1.5mm connectors	P1585
Stardust CT2 effort sensor, adult, harwin connector	P1805
CT2 effort sensor, adult, Alice 5, 1.5mm connectors	P1586
CT2, effort sensor, pediatric, Alice 5, 1.5mm connectors	P1587
CT2, effort sensor, adult, Alice 4, LEMO triaxial connector	P1804
CT2, effort sensor, pediatric, Alice 4, LEMO triaxial connector	P1814
CT2, effort sensor, adult, Alice 3, 2-pin LEMO connector	P1803
CT2, effort sensor, pediatric, Alice 3, 2-pin LEMO connector	P1813
CT2, effort sensor, adult, Embletta, 249 connector (2-pin keyhole)	P1800
CT2, effort sensor, chest, adult, dark gray, 16", 249 connector (2-pin keyhole)	P1823
CT2, effort sensor, abdominal, adult, light gray, 19", 249 connector (2-pin keyhole)	P1824
CT2, effort sensor, chest, pediatric, dark gray, 16", 249 connector (2-pin keyhole)	P1825
CT2, effort sensor, abdominal, pediatric, light gray, 19", 249 connector (2-pin keyhole)	P1826

Piezo respiratory effort sensors

- Sensor straps are easy to size on most patients
- Low profile of the sensor straps enhances patient comfort
- Compatible with most PSG systems
- Plugs directly into standard AC channels
- Latex free
- One-year warranty

Piezo respiratory effort accessories

Description	Part number
CT2, 18" extension strap	P1592
CT1 belt strap, adult, size 1, 1.5"w, 33.5"l	P1421
CT1 belt strap, adult, size 2, 1.5"w, 49"l	P1422
CT1 belt strap, adult, size 3, 1.5"w, 77"l	P1423

Body position sensors

Body position sensors

Description	Part number
SPI (sleep position indicator) resistive, Cadwell, 8-8 modular plug	P1652
Body position sensor, DC with 3.5mm connector	P1664
Body position sensor, DC with 1.5mm connector	P1664-WS2074
SPI resistive Flaga, 1.5mm connector	P1676
Body position sensor, 220 connector (3 pin keyhole), Bio-Logic	P1692
Body position sensor, Alice 6, 249 connector (2-pin keyhole)	1078758
Body position sensor, Alice 5 , 1.5mm connectors	P1694
Body position sensor, Alice 4, LEMO triaxial connector	P1707
Body position sensor, Alice 3, LEMO connector	P1706
Body position sensor, Sandman SD20, 249 connector (2-pin keyhole) (yellow)	P1719
Body position sensor, Sandman Pocket, 249 connector (2-pin keyhole) (gray)	P1744
Body position sensor, DC with 3.5mm female connector	P1746

Body position sensors

- Designed with patient comfort in mind
- Ability to identify the primary sleep positions (prone, supine, left, right, and upright)
- Patient's body position can be continuously monitored regardless of the amount of movement
- Attaches to the thoracic respiratory effort belt easily and comfortably
- Compatible with most PSG systems
- One-year warranty

Snore sensors and microphones

Description	Part number
Piezo snore sensor, 1.5mm connector	P1696
Snore sensor, Embletta, 249 connector (2-pin keyhole)	P1718
Snore microphone, 1.5mm connector	P1716
Snore microphone, Alice 6, 249 connector (2-pin keyhole)	1078753
Snore microphone, Alice 3, 3/32 phone connector	8017
Microphone snore, Sandman Pocket, 249 connector (2-pin keyhole)	P1742
Microphone snore, binder, 50cm wire length	P1900

Snore sensors and microphones

- The snore sensor, with its thin piezo crystal, is designed to provide an accurate, reproducible signal
- The snore microphone is designed to provide a thin baseline and clear, responsive signals
- Compatible with most PSG systems
- Six-month warranty for snore sensors
- Ninety-day warranty for snore microphone

Periodic limb movement (PLM)

Description	Part number
PLM sensor, Alice 6, 249 connector (2-pin keyhole)	1078752
Piezo PLM, 1.5mm connectors	P1697
Piezo PLM kit Kit contains: 1 each P1697 PLM sensor, 1 each P1689 Velcro strap PLM large, 1 each P1690 Velcro strap PLM small	P1698R
Piezo PLM 2 per kit Kit contains: 2 each P1697 PLM sensor, 2 each P1689 Velcro strap PLM large, 2 each P1690 Velcro strap PLM small, 1 each, P1097 safety male jumper wireset	P1699R

Periodic limb movement (PLM) accessories

Description	Part number
Jumper, wireset, 1.5mm	P1097
Velcro strap PLM, large	P1689
Velcro strap PLM, small	P1690

Periodic limb movement sensors

- Detect a patient's leg or arm movement
- Designed to provide clean, reliable signals while providing exceptional patient comfort
- Sensitive to subtle movements
- Do not require skin preparation prior to application
- Using kits, multiple sensors can be configured to combine PLM signals onto a single channel
- Six-month warranty

Sensor tester

Sensor tester

Description	Part number
ST-3, tests most PSG, includes P1315, continuity test wireset	P1711R
ST-3, Alice 5, includes P1315, continuity test wireset	P1722

Sensor tester accessories

Description	Part number
ST-3, continuity test wireset	P1315
Low level cable, 1.5mm connectors	P1075
High level cable, 1/8 male connector	P1078
High level cable, 3.5mm connector	P1138

ST-3 sensor tester

- Provides ability to test sensors prior to sleep studies
- Checks and verifies EEG electrodes and wires for continuity
- Square wave generator verifies polygraph channels and helps verify that the jackbox inputs and DC hi-level boxes are functional
- One-year warranty

Education materials

Beyond just offering products and technology, we help you help staff and patients by providing product literature, instructional videos, reimbursement information, and patient educational materials.

Category	Description	Format	Part number
For staff			
Product support	Alice PDx clinician tutorial	CD-ROM	1055918
	What you need to know about RIP	Poster	1081437
	Actigraphy clinical scenarios	DVD	1043293
	RIP and zRIP learning guide and FAQ's	Booklet	1079901
Reimbursement information	Helpful hints for filing – Home sleep testing sleep studies	Brochure	1075752
	Helpful hints for filing – Polysomnography and home sleep testing for diagnosing OSA	Brochure	1093107
	Helpful hints for filing – Oral appliances for the treatment of OSA	Brochure	1091987
Continuing education	Intro to sleep diagnostic equipment monograph	Booklet	1052673
Insomnia program	Cognitive behavioral therapy for insomnia (CBTI)	Binder	Ask your sales representative
For patients			
Patient education	Having a sleep study	Pamphlet	1049375
	Having a home sleep study	Pamphlet	1064487
	I have sleep apnea. Now what?	Brochure	1038370
Product setup	Stardust II patient instructions, video	DVD	1063504
Product setup	Alice PDx patient instructions, video	DVD	1055905

Appendix: AASM scoring manual guidelines and Pro-Tech sensor application

AASM scoring manual guideline – adults	Pro-Tech sensor
Thermal airflow Adults VIII.1.A: "The sensor to detect absence of airflow...is an oronasal thermal sensor."	Oronasal thermocouple P1222
Flow nasal pressure Adults VIII.1.B: "The sensor for detection of.... hypopnea is a nasal air pressure transducer..."	PTAF2 startup kit P1287 Nasal cannulas: adult (60 per case) P1259
Respiratory effort Adults VIII.1.C: "The sensor for detection of respiratory effort is.... inductance plethysmography."	Respiratory Inductance Plethysmography: zRIP DuraBelt kit, adult 1076329 or ezRIP adult kit, 1099514

AASM scoring manual guideline – children	Pro-Tech sensor
Thermal airflow Children VIII.1.A: "The sensor to detect absence of airflow....is an oronasal thermal sensor."	Oronasal thermocouple P1223
Flow nasal pressure Children VIII.1.B: "The sensor for detection of.... hypopnea is a nasal air pressure transducer..."	PTAF2 startup kit P1287 Nasal cannulas: pediatric (60 per case) P1263
Respiratory effort Children VIII.1.C: "The sensor for detection of respiratory effort is.... inductance plethysmography."	Respiratory Inductance Plethysmography: zRIP DuraBelt kit, pediatric 1076330 or ezRIP module, abdomen, 1094094, ezRIP module, thorax, 1094096 and zRIP DuraBelt, pediatric, 1075970
Hypoventilation Children VIII.1.E: "Acceptable methods for assessing alveolar hypoventilation.... end-tidal PCO_2 monitoring." Enable $EtCO_2$ and pressure monitoring simultaneously from both nostrils using one cannula.	Pro-Flow MultiPurpose Cannula: pediatric (30 per case) P1346

Value-added programs

Philips Respironics offers a broad array of programs aimed at helping to maximize your growth and operational efficiencies. From compliance and resupply to training and warranties, we provide a spectrum of unique programs focused on facilitating success for you and your patients.

Not all products are available in all countries. Check with Philips Respironics customer service or your local distributor.

Device programs

Flex Promise Program

Our Flex Promise Program is Philips Respironics' commitment that if any patient is noncompliant on any of our Flex technologies, upon return of the unit with Flex technology, we will apply a 100% credit of the corresponding unit purchase price toward the purchase of a Philips Respironics bi-level device with Bi-Flex.

Bi-level Rescue Program

This program is intended to help patients continue their PAP therapy when they are not able to tolerate standard treatment. Order bi-level monograph (PN 1038429) for more details.

Extended Warranty Program

The Extended Warranty supports all System One PAP devices and adds three years of coverage to the standard two-year warranty – providing five years of protection on a PAP device or humidifier against unexpected repair costs and shortening the time the device is out of service.

System One Touch Non-warranty Service Program

For devices not covered under warranty, the System One Touch Non-warranty Service Program offers a simple two-tiered approach to repair costs that helps to accelerate the return of the repaired unit to the patient and reimbursement turnaround times.

Mask programs

30-Day Mask Satisfaction Promise Program

Your patient will be satisfied with our mask or we'll replace it. If a patient discontinues use of a program-approved mask in favor of another mask during the first 30 days of use, we will replace the original mask at no charge. Certain terms and conditions apply.

Fit for Life Mask Resupply Program

Philips Respironics offers a comprehensive sleep apnea mask solution that helps keep you in touch with your patients through the lifetime of their therapy. By offering a patient interface solution with a mask and resupply service included in the purchase price, Philips Respironics demonstrates a commitment to the long-term success of your patients' therapy and your business. When you choose our masks, your patients will receive access to either our medSage or Encore Resupply services. The Fit for Life solution benefits both your patients and you by increasing patient compliance and satisfaction and helping you develop a standard, quality-driven approach to meeting the payer and industry requirements that are making in-house resupply programs more challenging.

Ventilation programs

Ventilation Promise Program

Progressive diseases like COPD and ALS have one thing in common – a patient's ventilator needs will change over time. We want to make it easy for you to transition your patients to higher level ventilator devices as their needs become more challenging. To enable you to easily transition patients to other devices as their diseases progress, the Ventilation Promise Program will provide a credit equal to the purchase price of any Philips Respironics' System One device to be applied toward the purchase of a BiPAP AVAPS or Trilogy ventilator. Certain terms and conditions apply.

Partners in Ventilation (PIV) Program

This program has identified the needs of homecare ventilation providers and designed a set of tools with one goal – to simplify your business so you can focus on what matters most – your patients. As a program member you will have access to ventilation-related resources developed by Philips Respironics. And your PIV membership is free.

Customer programs

Partners in Compliance Management

The Encore Anywhere compliance data management system makes patient data available easily and securely. Additional compliance management resources can be found at: www.sleepapnea.com. It's all part of our solution to help you meet your business goals, enhance staff efficiency, and coordinate patient care more quickly and easily.

Partners in Training

The Partners in Training web site is a sleep apnea awareness resource designed to help homecare providers, clinicians, and physicians better understand how to identify, treat and manage sleep apnea, while helping to improve business/practice potential.

Cognitive Behavioral Therapy for Insomnia (CBTI)

This program provides sleep labs with a means to implement a behavioral sleep medicine program or enhance their current offerings without incurring the development cost and time of doing it themselves. Additionally, it enables them to implement an objective tool (Actiwatch) for therapeutic assessment as an adjunct to traditional, subjective diaries.

Know How Webinars

The Philips Respironics Know How program is a series of live and on-demand webinars that help to address key business and clinical challenges and opportunities faced by homecare providers and healthcare professionals. Visit http://knowhow.respironics.com to learn more and to register for the various sessions.

Medical education

For respiratory therapists, sleep technicians and nurses, Philips Respironics CEU-accredited programs target respiratory drug delivery, noninvasive and invasive ventilation, oxygen and sleep therapy and are focused on your continuing education requirements.

To learn about additional training opportunities relating to sleep apnea, visit our Partners in Training web site at **www.pit.respironics.com**

Not all products are available in all countries. Check with Philips Respironics customer service or your local distributor.

Sleep therapy presentations

The mask experience

2 CEUs, AARC, AAST

A lecture, followed by a hands-on session to learn how to choose the right mask for the right patient

- Understand the challenges the OSA patient faces in order to be compliant to his or her CPAP therapy
- Understand why your patient needs to be compliant to CPAP therapy
- Understand how to choose the right mask to help your patient be compliant to CPAP therapy
- Understand the types of masks
- Understand the significance of resupply

Fundamentals of obstructive sleep apnea

1 CEU, AARC, AAST, CCMC

Understand the pathology and prevalence of OSA and learn how to recommend appropriate diagnostic and treatment options

- Understand the types of Sleep Disordered Breathing (SDB)
- Understand the prevalence of SDB
- Recommend appropriate diagnosis and screening procedures
- Discuss various treatment and follow-up management options

Tools for a successful sleep therapy compliance program

1 CEU, AARC, AAST

This session will cover the challenges of running a successful Sleep Therapy Compliance Program and provides caregivers with the clinical tools/techniques to be successful

- Provide overview of PAP compliance
- Understand consequences of non-compliance
- Explore techniques, tools, and technologies to facilitate compliance

Advanced algorithms for SDB

1.5 CEUs, AARC, AAST

Learn about leak and triggering technology, understand the CPAP breathing algorithms, and identify the breathing algorithms for periodic breathing and respiratory insufficiency

- Review Auto-EPAP, autoSV, AVAPS, Auto-Trak, C-Flex
- Emphasis on Philips Respironics technology

Titration guidelines for CPAP, bi-level, servo ventilation, and AVAPS

1.5 CEUs, AARC, AAST

List the titration goals for OSA management, understand the suggested protocols for titrations and review the titration process

- Suggest a titration procedure for basic CPAP
- Suggest a titration procedure for autoSV

Maximizing PAP therapy through advanced techniques: ASV and AVAPS

1 CEU, AARC, AAST

This session will help you identify which of your patients will benefit from advanced therapies

- Explain when to use servo ventilation
- Explain when to use AVAPS

Data management of the SDB patient

1 CEU, AARC, AAST

Review the management and follow-up of PAP therapy through the use of the Encore data management software and learn how to interpret the reports and waveforms and how this combines with a self-management system

- Describe the management of a patient through the use of data management software
- Recognize that compliance leads to positive health outcomes
- Discuss an overview of compliance technologies in healthcare
- Describe tools and technologies to facilitate PAP compliance

Home sleep testing

1 CEU, AARC, AAST

A review of the guidelines for home sleep testing and which patient is best suited for diagnosis and titration in the home

- Identify the predisposing factors for OSA
- Describe the co-morbidities that require a full in-lab sleep study
- Identify good candidates for portable monitoring, pre-screening questionnaires
- Describe equipment used to perform portable monitoring

Respiratory drug delivery presentations

Pediatric inhalation devices

1 CEU, AARC

Presentation will cover pediatric aerosol delivery

- Explain the rationale of use of commonly inhaled drugs that are used in the management of pediatric respiratory disease
- Increase the level of understanding for pediatric aerosol therapy
- Explain the benefits and shortcomings of devices that are used for aerosol therapy for pediatric patients

Current aerosol therapy: theory and practice

1 CEU, AARC, CCMC

Reviews basic respiratory anatomy and physiology and respiratory diseases, provides an overview of the history of inhalation drug delivery devices, and defines the design principles of these devices

- Review of respiratory anatomy and physiology
- Understand basic principles of an aerosol device
- Define and differentiate the following respiratory drug delivery devices: dry powdered inhalers, metered dose inhalers, and jet nebulizers

Home respiratory care presentations

Portable home oxygen equipment matching the patient to the proper device

1 CEU, AARC

This presentation will help participants gain a better understanding of the clinical and operational differences between stationary and portable oxygen equipment and will detail methods for matching portable oxygen equipment to specific patient needs

- Identify methods to match portable oxygen equipment to patient needs
- Discuss the clinical and operational differences among portable oxygen devices/equipment
- Explain how oxygen-conserving device technology applies to portable oxygen equipment

Trilogy ventilator workshop

2 CEUs, AARC

Learn more about the operation of the Trilogy100 and Trilogy200 life support ventilators

- Review the circuit options, breath types, modes, alarms, features, and troubleshooting

CoughAssist T70 approach to secretion management

1 CEU, AARC

This workshop educates respiratory therapists and nurses on the operation of the CoughAssist T70 device and will cover indications, contraindications, operation procedure recommended treatment practice and review of a clinical case study

- Understand the indications, contraindications and warnings/cautions for the use of CoughAssist T70
- Identify the advantages of the noninvasive use of CoughAssist T70 over invasive airway clearance
- Review a clinical case study
- Learn the controls, connectors, and visual indicators of the device
- Discuss the recommended treatment plan
- Understand cleaning and maintenance of the CoughAssist T70 device

The continuum of products and solutions for the COPD patient

1 CEU, AARC

Participants will receive a brief review of COPD staging as we discuss how Philips Respironics' comprehensive product portfolio can help you to manage your COPD patients throughout the disease progression

- Review COPD
- Discuss current practices for treatment and components of care
- Review COPD staging
- Identify the Philips Respironics products and solutions as they relate to the progression of COPD
- Present tools which will help your DME to grow and thrive in today's market

Respiratory advances of mouth piece ventilation

1 CEU, AARC

This course will cover an additional option to provide noninvasive ventilation for the chronic respiratory insufficiency patient

- Identify options for 24-hour ventilation without the need for tracheostomy
- Discuss how to prevent the pulmonary complications related to tracheostomy
- Describe infection reduction–granuloma formation chronic bacterial colonization
- Explain cough generation from a closed airway
